WORK EXPERIENCE

IT Intern – Batangas State University (IPDO)
Web Developer

- Participated in the development of institutional portals, including the Alumni Portal and the General Appropriations Act (GAA) Portal, enhancing accessibility and operational efficiency. Supported data management efforts by applying practices that ensured accuracy, consistency, and reliability of institutional information.

Capstone Project - Ibaan Central School Portal
Full-stack Web Developer

- Developed a Web School Portal designed to streamline academic processes and support data-driven decision-making. Incorporated an analytics feature to evaluate student performance, enabling timely interventions and targeted recommendations that helped improve academic outcomes.

Freelance Project
UI/UX Designer & Web Developer

- Developed customized web systems and designed user-friendly UI/UX layouts that enhanced functionality and visual appeal. Worked closely with clients to identify requirements, implement solutions, and deliver efficient and user-focused digital products.
